Amir Khatiby, Cloud Developer

Gothenburg, +46723165264, amir_khatiby@hotmail.com

Summary

I have a solid background in backend development with experience in Go, Java, NodeJS and SQL. My education has provided me with a strong understanding of AWS and Azure. I have successfully completed multiple end-to-end projects, from development in local environments to deployment in the cloud. You can view my work on my portfolio website, currently hosted on AWS.

Work Experience

Feb 2024 - May 2024 Cloud Developer The Everyone Store (Internship)   Remote

At my internship with The Everyone Store, I developed Java backend solutions and managed a cloud-based PostgreSQL database on Heroku, which we eventually migrated to AWS. I also set up and maintained a CI/CD pipeline to ensure efficient project workflows.

Nov 2023 - Feb 2024 Fullstack Developer, Swedcon18 (Internship)   Remote

During my initial internship as a developer, I contributed to the development of scalable web applications, utilizing TypeScript, React, and Java Spring Boot. My role involved integrating databases such as MySQL and MongoDB, focusing on learning and applying best practices in data management and application functionality. I also worked with implementing Jitsi as a service to the project, my part was developing the backend which was done with the help of Jaas documentation.

Jan 2022 - Present   Retail Sales Associate, Tele2 (Part-Time)   Gothenburg

Specialize in technical sales to both private and business customers, offering exceptional service and tailored Tele2 solutions.

Jun 2021 - Aug 2021 Marketing and Sales, Storytel   Sweden

Promoted Storytel's audiobooks across Sweden, advocating for educational accessibility. Utilized strategic engagement to elevate awareness and transform educational approaches.
